Interesting Facts

There were 28 species listed on the score sheet, but only 7 of these were submitted

The top placegetters had the most number of species

On average the points awarded for weight were of the same order as the points awarded for the species

No single species dominated the points contribution relative to the others, implying the yardstick worked reasonably well.

Only 12 pairs out of a total of 17 presented fish at the weigh in

A total of 35 fish were submitted

On average, each pair in the competition submitted only 2 fish!

Total fishing effort = 34 divers x 7 hours = 238 hours

Average effort per submitted fish = 6.8 man hours
